

**Nolla Hand Sanitizer Foam** eliminates bacteria with a moisturizing alcohol-free formula.

This foam is based on Nolla™ silver polymer technology. Germs are killed by the activity of silver ions released from a non-irritating polymer molecule. Unlike alcohol-based sanitizers, Nolla Hand Sanitizer Foam does not sting or leave hands sticky. Moisturizers such as naturally occurring betaine control water balance and reduce chemical irritation in skin. Nolla Hand Sanitizer Foam provides a long-lasting effect against bacteria, leaving hands soft and clean.

Efficacy has been tested by an independent test laboratory at Helsinki University according to EN1500 standard test. Nolla™ silver polymer has been proved less toxic than alcohol-based hand sanitizer gels according to BUS-model.

- ✓ KILLS 99.99% OF GERMS
- ✓ ALCOHOL FREE
- ✓ LEAVES HANDS SOFT & MOISTURIZED
- ✓ FULFILLS EN1500

## PRODUCT DETAILS

USAGE	▶ Press foamer piston 2-3 times and spread evenly by rubbing hands together until dry.
ACTIVE INGREDIENT	▶ Silver Chloride (<0.1%)
OTHER INGREDIENTS	▶ Aqua, Betaine, Butylene Glycol, Cocamine Oxide, PEI-1750, Aminomethyl Propanol, Lactic Acid
CAUTION	▶ Use biocides safely. Always read the label and product information before use.
BUSINESS	▶ We offer two forms of cooperation with our Hand Sanitizer Foam:  <b>Private label</b> - our contract manufacturers manufacture the product with your branding  <b>Licensing</b> - dramatically reduce your manufacturing costs by licensing Nolla™ silver polymer technology

## PACKAGING

50ml foamer bottle

*private label example*
